## Wanda Color Documentation Tools

Wanda has over 60,000 up-to-date colors to match the wide variety of today's vehicles. Precise color selection is made easy with Wanda color documentation tools — ColorPro, Colormap and Variant Color Decks. New colors are developed as they come out from the car manufacturers and each tool works to help you define the color you need, so you are never left guessing.

### ColorPro

ColorPro is an advanced color retrieval system specifically developed for jobber stores and body shops. With it, you not only have the right color, but also have a number of tools that make your daily routine much more practical. New colors are developed as they come out from the car makers and are updated four times a year.

### Variant Color Decks

Variant Color Decks contain the original standard colors and the color variants which provide an accurate tool for color matching.

Smart Look. Smart Choice.

## Colormap

Colormap is a practical visual reference guide that contains more than 8,500 chips covering a broad spectrum of colors. It is systematically organized in two volumes,

one for solid colors and one for metallic/pearl colors. It can be used to select a color, color combination or to identify a color when no reference is available.

## Toner Chart

Toner charts are the essential tools in all mixing rooms for any color adjustments.
